On behalf of the Suffolk Care Collaborative, the Office of Population Health at Stony Brook Medicine would like to invite you to attend the Project Advisory Committee (PAC) Meeting of the Suffolk PPS perusing the DSRIP Program.

We firmly believe that our vision to become a highly effective, accountable, integrated, patient-centric delivery system has positioned us well to participate meaningfully in the DSRIP Program. Importantly, some of the many goals will include the capacity to optimize patients’ self-care abilities, improve access to community-based resources, break down care continuum silos and, reduce avoidable hospital admissions and emergency room visits. With your participation, we are confident that these objectives are within reach.
