

# Get Help with your Health

The SCC Community Health Activation Program (SCC CHAP) is working on new ways for Suffolk County residents to have better access to health care.

## Who we're trying to reach:

- People without health insurance
- People with Medicaid
- People who need help managing ongoing health conditions, such as heart disease, diabetes and mental health conditions
- People who want to stop smoking or lose weight
- People who don't have transportation to doctors or who need "after-hours" appointments
- People who can't always afford their medicine

Starting soon Community Health Workers will be coming to your neighborhood to explain how the SCC is making it easier for residents of Suffolk County to get help with their health.

You'll be invited to complete a survey to help us understand what your health needs are so that we can help you get connected to the services and resources you and your family need.

Look for one of our Community Health Workers at this location in the coming months
