For BOX questions or access related inquiries, please contact Janine Muccio, Janine.Muccio@stonybrookmedicine.edu

Patient Group: Medicaid Patient Data (Medicaid may be Primary, Secondary or Tertiary Insurance)

Time Period: **October 1, 2018 – December 31, 2018**

Project 2bvii: INTERACT Project

Patient Engagement Definition: As per the definition of actively engaged, patient engagement refers to the number of participating patients who avoided nursing home to hospital transfer, attributable to INTERACT principles as established within the project requirements. Duplicate counts of patients are not allowed. The count is not additive across DSRIP years. **Any patient who was transferred to an acute facility (i.e. hospital even if they were not admitted to the hospital) from the nursing home would not count as actively engaged.**

Please see excel template for formatting specifications.

Requested Data Elements:

1. CIN #
2. Patient Last Name
